DESCRIPTION

Oclip 2 Series — Clip into Action. Flip into Freedom.

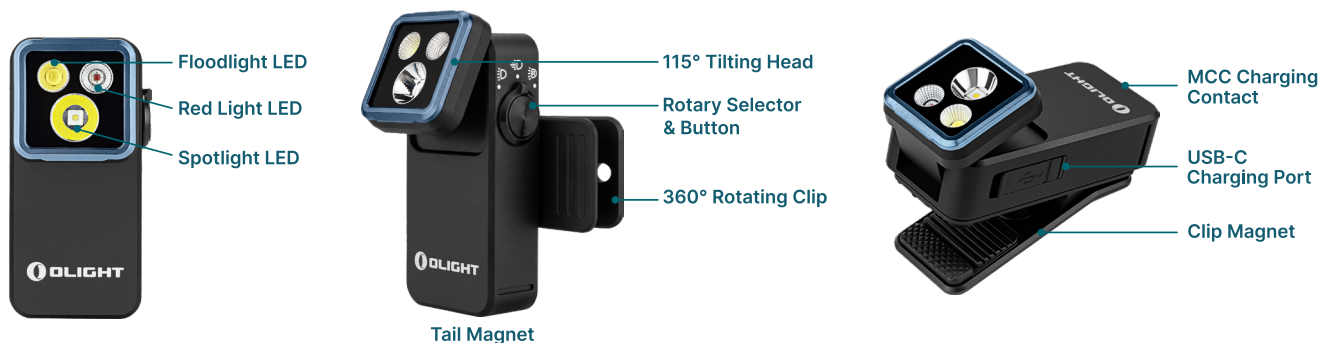

Featuring an all-new dual-axis directional system, Oclip 2 Series lets you tilt the light head up to 115° and rotate the clip a full 360°. Wherever your focus takes you, the light follows.

Clip it, stick it, or hang it. Place your light wherever you need it and aim it exactly where you want. Choose the right light for every moment—flood, spot, or red. For even greater versatility, Oclip 2 Ultra features our industry-first, in-house-developed R/UV emitter, combining red and UV light in one compact design. With four light sources in one, it gives you the freedom to choose the perfect light for every task.

Both Pro Premium and Ultra Premium include the same Mobile Charging Dock, keeping your light topped up and ready to go while providing up to twice the total runtime.

Oclip 2 Series gives light the freedom to move with you.

FEATURES

Oclip 2 Pro & Pro Premium

Free to Aim Your Light: Direct the beam exactly where you need it. The all-new dual-axis system tilts the head through 115° and rotates the clip a full 360°. In a crowded engine bay, rotate the clip to direct the beam past a hose, then tilt the head to aim the beam directly on a bolt, all without repositioning the light or changing your posture.

Free to Choose Your Light: Three beams, one selector. Fill the work area with up to 530 lumens of floodlight, reach 125 meters with a focused spotlight, or preserve night vision with red light. From close-up repairs and patrol work to nighttime dog walks, the right beam is one twist away.

Free to Place Your Light: Clip it, stick it, or hang it. The clip grips objects up to 14 mm thick, including collars, backpack straps, and MOLLE webbing. Magnets at the MCC tail and on the clip snap onto steel surfaces like a car hood or toolbox. It can also hang overhead from a tent loop or hook. However you place it, both hands stay free.

Flexible, Yet Durable: Built to flex, engineered to hold. The dual-axis mechanism has passed a 10,000-cycle rotation test, delivering smooth adjustment and reliable positioning again and again. The clip also withstands 10,000 clipping cycles. IP66 protection and 2-meter drop resistance make it ready for tough everyday use.

Charge Your Way, Go Further with the Dock: Recharge easily through USB-C or MCC. Choose Premium to add the 1,000 mAh Mobile Charging Dock. It automatically tops up the light on the go, delivers up to twice the total runtime, and displays the battery levels of both the light and the dock at a glance.

Oclip 2 Ultra & Ultra Premium

Refined. Distinctly Yours: Crafted with high-strength, scratch-resistant OAL aluminum, Oclip 2 Ultra pairs a bold, angular design with a sharper, more distinctive everyday-carry presence. Flip the head and the OclipBeat breathing light comes alive, changing color the more you use it and marking your time together in a way that feels uniquely yours.

Free to Aim Your Light: Direct the beam exactly where you need it. The all-new dual-axis system tilts the head through 115° and rotates the clip a full 360°. In a crowded engine bay, rotate the clip to direct the beam past a hose, then tilt the head to aim the beam directly on a bolt, all without repositioning the light or changing your posture.

Free to Choose Your Light: Four beams, one selector. Fill the work area with up to 580 lumens of floodlight, reach 130 meters with a focused spotlight, or preserve night vision with red light. Exclusive to Ultra, the industry-first R/UV emitter, developed in-house, integrates red and UV in one compact design, delivering up to 800 mW of UV for quick inspections.

Free to Place Your Light: Clip it, stick it, or hang it. The clip grips objects up to 14 mm thick, including collars, backpack straps, and MOLLE webbing. Magnets at the MCC tail and on the clip snap onto steel surfaces like a car hood or toolbox. It can also hang overhead from a tent loop or hook. However you place it, both hands stay free.

Flexible, Yet Durable: Built to flex, engineered to hold. The dual-axis mechanism has passed a 10,000-cycle rotation test, delivering smooth adjustment and reliable positioning again and again. The clip also withstands 10,000 clipping cycles. IP66 protection and 2-meter drop resistance make it ready for tough everyday use.

Charge Your Way, Go Further with the Dock: Recharge easily through USB-C or MCC. Choose Premium to add the 1,000 mAh Mobile Charging Dock. It automatically tops up the light on the go, delivers up to twice the total runtime, and displays the battery levels of both the light and the dock at a glance.
